21.	Find the magnitude of emf in volts of a single battery which is equivalent to a combination of three batteries as shown in figure.

Sol.	The given combination consists of two batteries in parallel and resultant of these two in series with the third one. For parallel combination we can apply,				

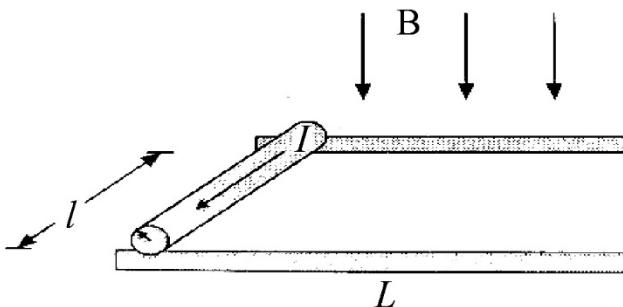

$$E_{eq} = \frac{\frac{E_1 - E_2}{r_1 + r_2}}{\frac{1}{r_1} + \frac{1}{r_2}} = \frac{\frac{10 - 4}{2}}{\frac{1}{2} + \frac{1}{2}} = 3V$$
